

A large, circular, metallic-looking button with a green border is the central focus. It features a white lightning bolt icon in the upper right corner. Below the icon, the words "E-MOBILITY" are written in a large, white, sans-serif font, underlined. Below the underline, the word "START" is written in a similar font. A finger is shown pressing the button from the left.

PROTECTION SYSTEMS
FOR **ELECTRIC AND**
HYBRID VEHICLES

Protecting

WE HAVE SOMETHING AGAINST RUST **THE PERFECT PROTECTION SYSTEM**

The internationally proven DINITROL 2-layer system protects underbody and cavities with high-quality rust protection products. Due to special nozzles and probe heads with a spray angle of up to 360°, the fluid penetrates even the smallest niches. Before and after application a hybrid or electric car is thoroughly washed and dried by DINITROL just like a vehicle with an internal combustion engine.

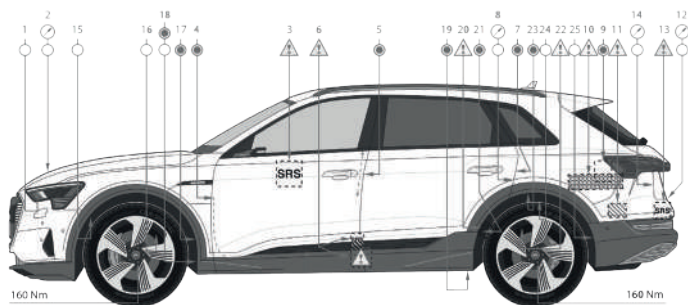

We offer the best solutions.

PROTECTING VALUES WITHOUT COMPROMISE

We have been at home in the world's workshops for over 70 years - with innovative products that protect your vehicles, increase their durability and make them safer.

We are experts in corrosion protection, which is often underestimated. Rain, road salt, condensation in the cavities, mechanical abrasion and insufficient basic protection – these are causes of rust that can threaten your vehicle and your safety. That is why a reliable corrosion protection, underbody protection and cavity sealing are so important.

We give you safety - Made in Europe

POWER ELECTRICITY CABLE

NO PRODUCT

During the preservation of electric or hybrid vehicles the orange power cables must be covered. They must not be preserved!

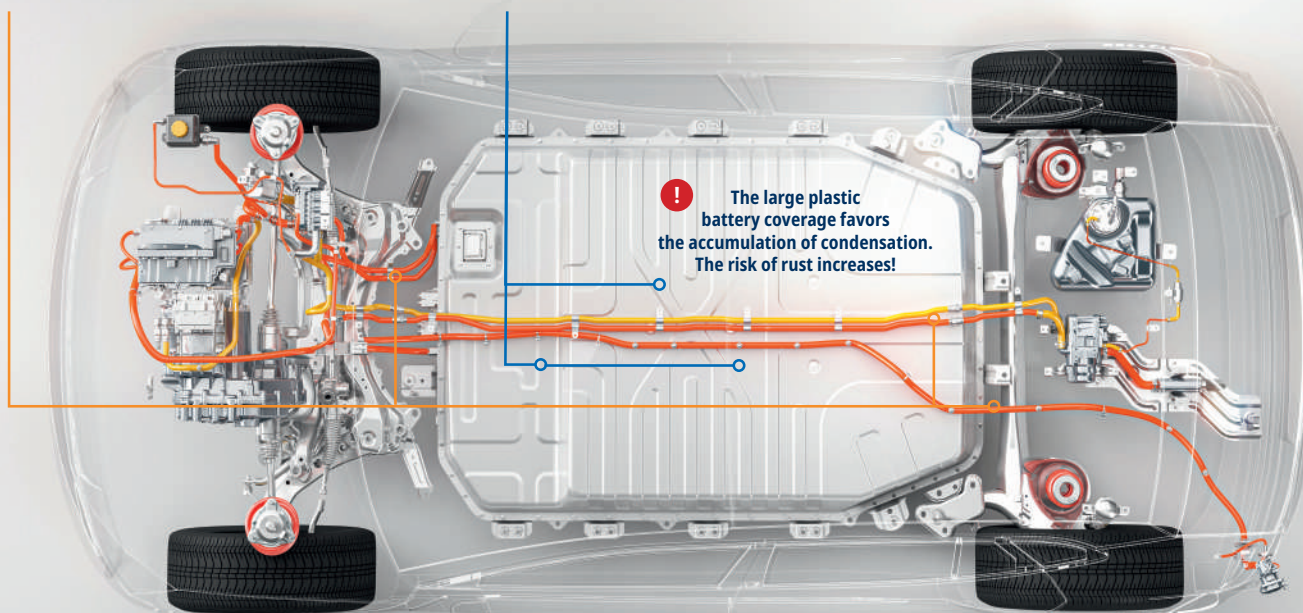

BATTERY

THIN PRODUCT

The preservation in the area of the battery on underbody may only be done with a thin preservative. The top side of batteries must not be preserved!

DINITROL

WE HAVE SOMETHING AGAINST RUST THE PERFECT PROTECTION SYSTEM

The internationally proven DINITROL 2-layer system protects underbody and cavities with high-quality rust protection products. Due to special nozzles and probe heads with a spray angle of up to 360°, the fluid penetrates even the smallest niches. Before and after application a hybrid or electric car is thoroughly washed and dried by DINITROL just like a vehicle with an internal combustion engine.

We offer the best solutions.

WE HAVE **GOOD ARGUMENTS** FOR OUR CORROSION PROTECTION

- **Double protection for underbody and cavities**
- **Exact maintenance plans for the sensitive electrical system**
- **Less repairs**
- **Stops rust in new and used cars**
- **Ideal addition to the basic rust protection at the factory**
- **Increases durability and safety**
- **Higher resale value**

WE HAVE A PLAN FOR ELECTRIC AND HYBRID CARS

Every vehicle has its own requirements. Of course, also electric and hybrid vehicles. So that there are no errors, we have detailed maintenance plans for you. And with regular training from our experienced technicians, we make sure that your vehicle is perfectly preserved and all electronic components and sensors work optimally – better safe than sorry.

Any questions? We are happy to help!
