

WORK INSTRUCTIONS 2-COMPONENT CARTRIDGE GUN

WORK INSTRUCTIONS

2-COMPONENT CARTRIDGE GUN

1 First, gather all the required materials and equipment. This includes the cartridge gun and if necessary, the aluminium locking ring, shrink-wrapped cartridge and associated mixer and a nozzle that suits your need.

2 To use the 2-component cartridge gun, first unlock the drive rod and pull it out completely.

3 Now remove the cartridge from the film, open the cap by turning it, and remove the plug. **ATTENTION!** The circlip for F-system cartridges will be reused.

4 Insert the cartridge, push the drive rod forwards and close the interlocking device lever.

5 Now evenly press out approx. 3 to 4 cm of the material.

6 Put the mixer with the nozzle on the cartridge. Put on the locking ring and rotate it 90 degrees.

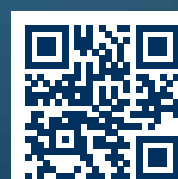

7 Start applying the adhesive.

8 Use the red knobs to regulate the speed and dosage.

9 To maintain a continuous flow without stopping the gun, set the dosage regulator to zero (= 0).

Here you can find our
application video.
