

DINITROL®

**ZERO RUST –
SUSTAINABLE
RUST REMOVAL**

Protecting

WE'VE GOT SOMETHING AGAINST RUST – WITH A SUSTAINABLE EFFECT

We developed a zero-tolerance strategy against rust: ZERO RUST. Whether it's tools, loose or installed parts, with ZERO RUST as a brush-on gel or a liquid bath, even the most stubborn rust will be completely removed for the long term. Depending on its condition, in 2 to 24 hours. The major advantage: You can immediately process the surfaces further.

ZERO RUST is the innovative result of extensive research. Our pioneering product is water-based and contains no acids, no petroleum-based solvents, and no caustic solutions. It is nontoxic, non-flammable, and biodegradable. It does not damage copper, brass, aluminium, plastics, rubber or vinyl. ZERO RUST only removes rust from all types of iron perfectly.

ZERO RUST is sustainably effective and 100% environmentally friendly as well. After use, you can simply pour the remaining product on your lawn. And it will become even greener. A clean solution – in every sense of the word.

- Removes even the most stubborn rust
- After 2-24 hours – depending on their condition – all parts will be clean again and can be further processed immediately
- Nontoxic (no acids or caustic solutions) and 100% biodegradable
- Ready-to-use as a gel or liquid without thinning

ZERO RUST 991 GEL

Base material		Water	
Item no.	Size	Container	Colour
11577	1 L	Can	Yellow / transparent

ZERO RUST 990 LIQUID

Base material		Water	
Item no.	Size	Container	Colour
11576	5 L	Can	Yellow / transparent

ZERO RUST WORK INSTRUCTIONS

1 a + b

Pour **DINITROL ZERO RUST** liquid into a bucket and place the items affected by rust into the bath. Depending on the degree of rusting, the treatment time can vary from 2-24 hours

2

Treat parts that cannot be placed in the liquid solution with **DINITROL ZERO RUST** gel.

3

It is just as simple to use: Brush the gel evenly onto the rusted parts and leave it on for 2-24 hours, depending on the degree of rusting.
When the treatment is finished, you can easily wipe off **DINITROL ZERO RUST** gel.

4

That also applies to the items immersed in the **DINITROL ZERO RUST** liquid bath.

5

Afterwards, the de-rusted surfaces are ready for follow-up processing without any further treatment.

6

DINITROL ZERO RUST is sustainably effective and 100% environmentally friendly as well. After use, you can simply pour the remaining product on your lawn. And it will become even greener. A clean solution – in every sense of the word.
