DINITROL 7710

Technical Details

Product description

DINITROL 7710 is a paste-like, exfoliating hand cleaner with a wood meal base.

Application

DINITROL 7710 is suitable for removing normal to medium amounts of dirt. It contains an extremely effective combination of surfactants and a high proportion of moisturising substances for skin-friendly treatment. The high cleaning power of the product is

enhanced by biodegradable wood meal-based exfoliating particles. In addition to its good biodegradability, wood meal is characterised by its low specific weight. This helps to prevent siphon blockages. The pH value of the product has been adapted to match the skin's own acid mantle.

In order to achieve an optimal effect, wet the hands with a little water. Rub hands together to dissolve dirt. Once the dirt has been dislodged, apply more water. Rinse hands to remove dirt and product and

carefully dry hands. In case of product contact with eyes, rinse immediately.

For additional information, please consult DINOL GmbH.

Technical Data

Colour	beige
Base	Wood flour, biodegradable
Shelf life (storage 15°C - 25°C)	30 months
Available in	10 L
