

WORK INSTRUCTIONS DINITROL COMPACT PUSH DISPENSER

WORK INSTRUCTIONS
DINITROL COMPACT
PUSH DISPENSER

1 All necessary materials should be set out ready at the start. These include the DINITROL Compact Push Dispenser with the aluminium cartridge, the two foil-wraps with A and B components, the DINITROL Manifold and the DINITROL Mixer, and the nozzle tailored to your needs.

2 To use the DINITROL Compact Push Dispenser, the locking lever must be opened first. Then pull the rack backwards and remove the aluminium cartridge.

3 Now fill the cartridge with the foilwraps.

4 Place the manifold on the aluminium cartridge. There is no need to manually cut the foilwraps as the merger automatically opens them.

5 Insert the cartridge, push the rack forward, and finally close the locking lever.

6 Now squeeze out and discard the material by approx. 3-4 cm without the DINITROL Mixer attached.

Important: This step must also be followed when the DINITROL Manifold and DINITROL Mixer are used multiple times.

7 Attach the mixer with nozzle onto the manifold.

8 Now start applying the adhesive.

The use of DINOL products is only suitable for experienced users. Preliminary tests are recommended for special applications.

For further details, please refer to the Technical Data Sheet and the PUR Pretreatment Table.

9 The speed and dosage can be adjusted using the red rotary controls.
To achieve a continuous flow without the dispenser stopping, the dosing control must be set to zero (= 0).

10 When fully pushed out, remove the cartridge, remove the manifold and discard the empty foilwraps. For larger amounts of adhesive, the DINITROL Mixer and DINITROL Manifold can be reused. (Observe pot life and instructions acc. to step 6.)

Article number	Designation	Content	Packaging
17009 00	DINITROL Compact Push Dispenser Dimensions: 46 (L) x 33 (H) cm Weight: 4.39 kg	1 x 2K cordless gun 1 x aluminium cartridge for foilwrap insertion A/B 1 x 20 V battery 1 x charger	1 Carton
